S240 HYDRAULIC ROCK SPLITTER

Shrikrishna's S240 Hydraulic Rock Splitter:
The Ultimate Solution for Efficient Rock Cracking

The Shrikrishna Equipment hydraulic rock splitter is one of the most popular rock splitting tools in India. Built using durable aluminum and specialized steel, its splitting cylinder is both lightweight and exceptionally strong, ensuring easy handling and superior performance. Designed for high-pressure operations, it delivers fast and efficient splitting results. Whether used in horizontal or vertical positions, this hydraulic splitter ensures quick outcomes with enhanced productivity. Available in models like S-36s, S-36, S-90, and S-240, it caters to various concrete and rock cracking and splitting requirements.

Model	Types of Wedge Set	Drill Hole Diameter (mm)	Drill Hole Depth (mm)	Splitting Distance (mm)	Splitting Force (kn/ton)	Length of Splitter (mm)	Weight (kg)
S240	R	48-50	610	20-50	4950/505	1290	35

KEY SPECS OF S240

- Single person can easily use to perform operation.
- Hydraulic Rock Splitter produces force of 505 Tons.
- Hydraulic Rock Splitter can work under water.
- Powerful on all types of ground strata.
- It can be used vertical and horizontal direction.
- Performs smooth splitting operation.
- Noiseless, environment – friendly and dust free operation.
- Operator can easily learn to operate the splitter within a short time.

**Mainly use for Trenching works,
for splitting the bolders,
surface breaking, Hard rock splitting**
